

1	I am not bringing any vertebrate animals.
2	I am not bringing any live tissue or body fluids.
3	I am not bringing any pathogens (viruses, bacteria or other infectious organisms) except those mounted in sealed microscope slides.
4	My display meets the dimensional requirements and is no more than 0.8 meters -front to back; 1.2 meters - side to side; and 3.5 meters - maximum height.
5	My display is constructed from approved materials (more information at www.asff.ca)
6	My display does not have any air pockets behind poster materials.
7	I am not using any open flames in my display.
8	I will turn off or disconnected any high intensity light sources (LASER's, ultra bright LED's etc.) from any power source while exhibiting my project.
9	I am only using CSA-approved extension cords and electrical connections and they are in good repair.
10	I am using indicator lights to indicate that the power is on, wherever it is practical.
11	I have installed insulating grommets for electrical wires entering homemade enclosures.
12	I have enclosed any electrical devices as far as it is practical.
13	All my electrical enclosures are non-combustible and all non-current carrying metal parts are grounded.
14	I am not using more than 36 Volts in any exposed live circuit parts and am using only low currents (amperage).
15	I am not using any wet cells (e.g. lead-acid batteries).
16	I have registered the use of any x-ray or other high energy equipment with the provincial government and obtained approval for its use. A formally trained and qualified individual has supervised the operation and has taken responsibility for its safe performance.
17	Any experimentation with recombinant DNA molecules or animal viruses was conducted under qualified supervision. Evidence of this supervision, including the supervisor's name, institution, and qualifications has been included.
18	I have provided documentation for any live tissue samples used in my investigations and will only display these if they are sealed.
19	I have not brought any radio-isotopes or compounds containing radio-isotopes with radiation levels above the background levels.
20	I have not brought any biological toxins.
21	I have not brought any micro-organisms.
22	I have not displayed any mixed cultures obtained from the environment (e.g., soils, mouth swabs) which I have used in my experiments.
23	I have not used any cells or tissues infected with animal or plant viruses.
24	I have not included any cultures in my exhibition. (Photographs or simulated cultures may be used.)
25	Any work involving hazardous materials was carried out under controlled laboratory conditions and supervision. The name and qualifications of the supervisor is specified.
26	I am not exhibiting or showing any material; which could decompose.
27	I understand that a lunch will be provided.
28	I have read, understand, and checked all of the above condition.
